Trial includes 30 free folder icons without interruption

Inspired by MacOS’s copy&paste

We were firstly introduced to this copy-and-paste folder icon in MacOS,
but found nothing as simple in Windows. That’s why we created foldericon.io

Make your workspace custom

Custom looking workspace

A picture is worth a thousand words. Don’t just read your folder name,
follow your intuition by designing your own custom folder icons

[show a folder with many custom folder icons]

Keep it in High Quality

We reduce your icon file size to minimum to save space on your PC,
while keeping it high quality.

[low size photo]

Paste right from your Photoshop documnent

Designing your own custom folder icon with Photoshop or any other design software?
Don’t bother exporting it, just copy and paste it directly!

[video of photoshop document to folder icon]

Or from Google Images

Simply copy an image from google and paste it.

[video of google images to folder icon]

Drag-n-drop

Already have a picture in your computer that you want
as your folder icon? Drop it like it’s hot.

Any picture format works

Focus on choosing your folder icons by your taste,
it doesn’t matter if your image is JPG, PNG or TIFF (or any thing else)!

[image of PNG, JPG, TIFF formats]...

Transparent backgrounds are kept

If you use PNG image with a transparent background, we’ll make sure it stays transparent.
